

ABOUT US

DELAB SCIENTIFIC Sdn Bhd
was established in 1997.

A leading supplier company specializing in digital and microprocessor based protection relays, power analyzer / meter, power factor regulator, digital time switch / multimeter, earth fault indicator and voltage monitoring relays.

Since our founding in 1997, we have committed ourselves to design, develop, and deliver advanced protection relay solutions that ensure the safety, reliability, and efficiency of electrical power systems. We are committed to pioneering innovative technologies that safeguard critical infrastructure, prevent equipment damage, and minimize downtime, thereby enabling our customers to achieve optimal operational performance and resilience.

Our innovative approach and dedication to excellence have positioned us as a trusted name in the industry.

OUR TEAM

Our team comprises skilled professionals engineers with extensive experience in electrical protection systems, dedicated to developing cutting-edge solutions that ensure the safety, reliability, and efficiency of our clients' power infrastructures. We believe in fostering a collaborative and inclusive work environment that drives success and innovation.

OUR MISSION

Innovation

We continuously innovate and integrate cutting-edge technologies to provide state-of-the-art protection relay solutions that meet the evolving needs of the power industry.

Quality and Reliability

We deliver high-quality, reliable products that exceed industry standards and ensure the continuous and safe operation of electrical systems.

Customer Focus

We believe in fostering a strong partnerships with our customers by understanding their unique challenges and providing tailored solutions that enhance their operational efficiency and safety.

Sustainability

We promote sustainable practices in our product development and operations, contributing to a greener and more resilient power infrastructure.

Expertise and Support

We offer unparalleled technical expertise and support to our customers, ensuring seamless implementation, operation, and maintenance of our protection relay systems.

By adhering to these principles, Delab Scientific Sdn Bhd strives to be a trusted leader in the field of protection relays, delivering exceptional value and peace of mind to our customers worldwide.
